

# JetScan™ 4091

## Currency and Tickets!

### Process currency and tickets in a single pass!

Used in cashier stations, cages, soft count rooms, and main banks, JetScan™ 4091 quickly processes currency, tickets or a mix of both at an uncompromising speed of 1,000 documents per minute.

Like all JetScans, this model can be used to count and total your *mixed* currency, as well as to eliminate “strangers” such as a \$20 in a bundle of \$100’s.

Tickets can be separated from currency and sorted to a different pocket. Ticket piece count and currency totals can be printed on peripheral printer. A listing of the actual ticket numbers can be exported to the host system.

Currency and ticket data can be tracked separately and uploaded to your slot accounting and ticket systems. Interfaces are available to most major slot accounting and ticket systems.
